

# DRAFT

Re: U.S.S.N. 08/183.594

## In the Abstract:

At page 25, line 1, before "portable" delete --A--.

At page 25, line 1, before "portable" insert --The invention relates to a--.

At page 25, line 1, after "field" insert --.---.

At page 25, line 2, delete the entire line.

At page 25, line 3, delete "at least one mobile interface unit."

At page 25, line 3, after "The" insert --system includes a--.

At page 25, line 3, after "interface unit" insert --that has--.

At page 25, line 3, delete "includes".

At page 25, line 6, replace "receive" with --receivers--.

At page 25, line 6, after "signals" insert --that are representative of a geographical location of the mobile unit--.

At page 25, line 6, after "from" replace "and" with --an--.

At page 25, line 6, after "source" delete ", wherein the position indicative".

At page 25, line 7, delete "signals are representative of a geographical location of the mobile interface unit".

At page 25, line 9, after "of" replace "said" with --the--.

At page 25, line 9, after "on" replace "said" with --the--.

At page 25, line 11, before "first" replace "the" with --a--.

At page 25, line 11, replace "process" with --processor--.

## In the Brief Description of the Drawings:

At page 7, line 18, after "transducers;" delete "and"

At page 7, line 20, after "Figure 1" replace "." with --; and--.

**DRAFT**

Re: U.S.S.N. 08/183,594

At page 7, after line 21, add a new paragraph as follows --Figure 11 shows a schematic block diagram of a central computer interfacing with the mobile interface unit of Figure 1, in accord with the invention.--

In the Detailed Description:

At page 9, line 7, after "change" insert --the--.

At page 9, line 7, after "memory" delete --the--.

At page 9, line 9, after "code." insert --The mobile unit can process externally generated position indicative signals received via the interface electronics 106 to automatically determine which particular golf course a golfer has selected to play. In response to that determination, the processor 104 can then access the digitized map information stored in memory 112 for the particular golf course. The processor 104 can also signal the display 110 to display an identification code associated with the particular golf course.--

At page 9, line 14, after "computer" insert --, such as that shown in FIGURE 11 at 1000,--.

At page 9, line 16, after "computer" insert --1000--.

At page 11, para. 4, line 1, replace "Optionally" with --As shown in FIGURE 11, optionally--.

At page 11, para. 4, line 2, after "clubhouse." insert --The central computer 100 can include an input/output interface 1002, a processor 1004, memory 1006, and a printer 1008.--.

At page 11, para. 4, line 2, after "load" delete --such--.

At page 11, para. 4, line 2, after "information" insert --regarding a round of golf--.

At page 11, para. 4, line 4, after "computer" insert --1000--.

At page 11, para. 4, line 4, after "of" insert --input/output interface 1002--.

At page 11, para. 4, line 4, after "208" delete ", FIGURE 2".

At page 11, para. 4, line 5, after "computer" insert --1000--.
